Collaborative Learning

The 60-, 90- and 120-seat Collaborative Learning Spaces offer flexibility, with movable furniture that enable you to transition learners from independent work to small or large group learning activities.

FLEXIBLE TABLES

Tables on wheels sit 6 participants, can be moved to change the classroom layout. They can be folded and placed aside to open the room for large group activities. Microphones kept in the Presenter Podium drawer can be placed at the tables for clear audio.

PRESENTER PODIUM

Each learning space features a Presenter Podium where you can connect your laptop, device, or present files from a USB stick. Bring in your remote participants using the Teams Touchscreen device and manage the room using the AV Touchscreen.

DISPLAY SCREENS

Four large display screens show your presentation materials and your remote participants. 120-person spaces also feature a large video wall display.

WHITEBOARDS

Four large whiteboards encourage sharing and collaboration. At the click of a button, a camera will focus on the whiteboard to display to your remote participants.

YOUR TEACHING SPACES

360.2.023	Seats 90	15 x 6-person flexible tables and 4 large display screens
360.2.025	Seats 60	10 x 6-person flexible tables and 4 large display screens
360.2.027	Seats 60	10 x 6-person flexible tables and 4 large display screens
360.3.032	Seats 90	15 x 6-person flexible tables and 4 large display screens
360.3.034	Seats 60	10 x 6-person flexible tables and 4 large display screens
360.4.003	Seats 120	20 x 6-person flexible tables and 4 large display screens and 18-screen video wall
360.4.031	Seats 120	20 x 6-person flexible tables and 21 large display screens and 18-screen video wall

Collaborative Learning
with **Breakout Corners**

On Level 3, one of the **60-seat Collaborative Learning Spaces** features design elements enabling you to experiment with breakout group experiences. With 60-seat capacity and furniture that can be rearranged as needed, it features additional *breakout corner display pods* for interactive group work.

FLEXIBLE TABLES

Tables on wheels sit 6 participants, can be moved to change the classroom layout. They can be folded and placed aside to open the room for large group activities. Microphones kept in the Presenter Podium drawer can be placed at the tables for clear audio.

DISPLAY SCREENS

Four large display screens show your presentation materials and your remote participants.
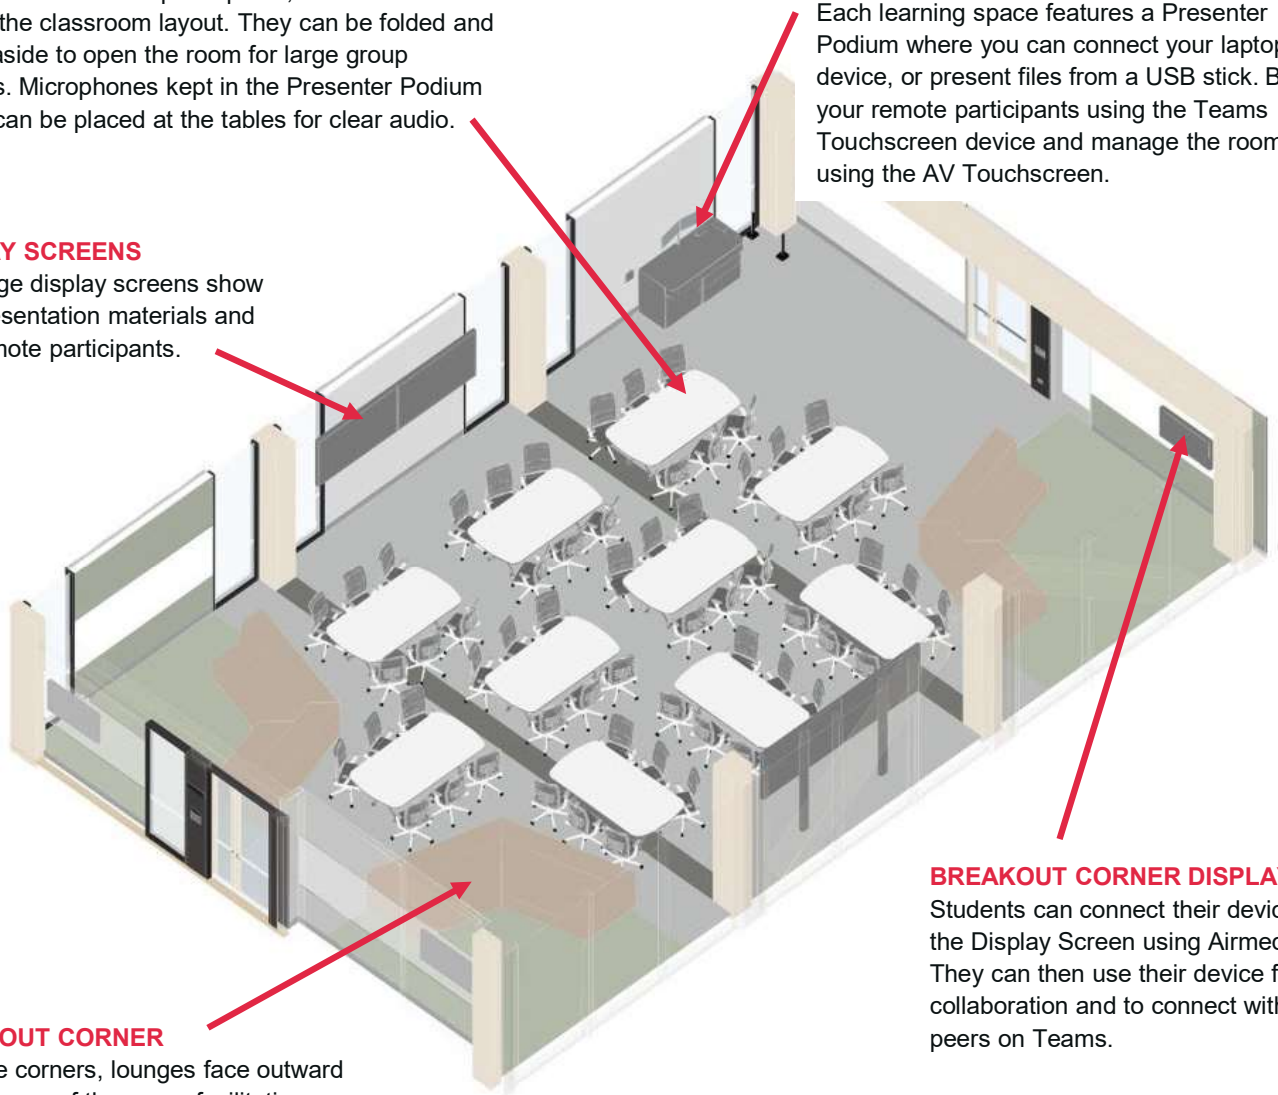

PRESENTER PODIUM

Each learning space features a Presenter Podium where you can connect your laptop, device, or present files from a USB stick. Bring in your remote participants using the Teams Touchscreen device and manage the room using the AV Touchscreen.

BREAKOUT CORNER DISPLAY

Students can connect their device to the Display Screen using Airmedia. They can then use their device for collaboration and to connect with peers on Teams.

BREAKOUT CORNER

On three corners, lounges face outward to the corner of the room, facilitating small group collaboration and discussion.

YOUR TEACHING SPACES

| 360.3.028 | Seats 60 | 10 x 6-person flexible tables and 4 large display screens; 3 x breakout corners with display screens |

Presenter Podium

The **Presenter Podium** is placed in each learning space and is the location where you connect to your Teams session, load presentation materials, control room cameras and monitors and locate portable technologies including a tablet, microphones and lectern.

1. MANAGE THE ROOM
Two devices help you manage cameras, microphones, and what is displayed on screens and monitors.

The **AV Touchscreen**, mounted to the podium, gives you touchscreen controls to change camera views, control student desks, and display your learning materials.

The **Room Control Tablet** duplicates the AV Touchscreen but is portable, allowing you to manage the room while you roam, present from the lectern, or deliver from a Student TEL Desk.

2. CONNECT TO TEAMS
The **Teams Touchscreen** will show timetabled classes. Clicking on Join will start the session and display your remote participants on the large display screen.

Microphones, both **lapel** and **handheld**, are present on the podium. In Collaborative Learning Spaces, the drawer will contain **portable microphones** that can be placed on the flexible desks.

3. DELIVER YOUR PRESENTATION
There are three ways to deliver your presentation.

Present using the **Document Camera** and the **Whiteboards** or share a **Student TEL Desk** screen.

Plugin a **Laptop** or portable device, using the **Preview Monitor** as an extended monitor. You can also connect to the large display screens using **AirMedia** and deliver wirelessly from your device.

Login to the **Podium PC** and access materials from a **USB**, Microsoft Teams, or present directly from the PC itself.

4. MANAGE WHAT STUDENTS SEE

The **Preview Monitor** allows you to navigate your presentation and learning materials before sharing to the large display screens and Teams session. On the Preview Monitor, you will preview exactly what students will see once you click on the **Left Screen** button on the **AV Touchscreen**.
