TOTAL CREDIT POINTS 72

Note: A second major is strongly recommended. To complete a second major within the B1390 Bachelor of Information Technology, take the core units of the second major in place of the indicated option/elective. Use the [Course Visualiser to build your study plan](#). <https://handbook.murdoch.edu.au/course-visualiser/>. Some of the option/electives shown can enable a second major (**Computer Science**) or minor (Web Development) when all units in that colour are also completed. *[ICT398](#) needs game engine C++ code prior to start. There are other second majors/minors which are not listed so [use the visualiser](#). View the advice and job/internship announcements at the [IT Student Hub in LMS](#). Do not have more than 30 points of first year units which includes any advanced standing. When possible complete ict284.

#Major Prerequisite: Maths background

[MAS164](#): Students who have achieved a final scaled score of 50% or more in ATAR Mathematics Methods or Specialist, WACE Mathematics Specialist 3C/3D or TEE Calculus may not enrol in MAS164. A preclusion for MAS164 is given and students will enrol in MAS162 instead.

[MAS162](#): Students who have completed MAS162 in a prior semester should enrol in option/elective. The recommended option/elective for this major is MAS225 Optimisation and Graph Theory. If you have a second major (strongly recommended) complete the core unit of the second major, and complete MAS225 in a later semester as an option/elective where possible.

Please note: This course plan is a sample only and must be read in conjunction with the full course structure, unit prerequisites and enrolment options as outlined in the [Handbook](#). This information is correct as at 19/11/2025.
