Semester notes	Trimester 1 notes	Trimester 2 notes
 * There is flexibility in the order you choose to enrol in the general elective unit, MSP100, and your choice of one of the three MSP200 level units. This flexibility allows you to choose your general elective unit from available elective units in both semesters. However, please note that you must complete MSP100 before the MSP200 level unit. ** MSP201 is not a self-enrolled unit and requires an approved application to grant enrolment. You must organise your real-world learning experience before enrolling. See more info about the unit, eligibility, and application deadlines in the Handbook: https://v3.pebblepad.com.au/spa/#/public/89jpzrpZ9j9jctmdcjxqHpjrrM. *** EXS309 is a full-year unit; you enrol in it only once, in semester 1, and exit it in semester 2. 	 * EXS603 Exercise Physiology Practicum is a full- year unit; you enrol in it only once, in trimester 1, and exit it in trimester 3. There is no external practicum in trimester 1. To qualify for external practicum, you must first complete three of the following units: EXS501, EXS502, EXS503, and EXS602. 	 * EXS505 Clinical Research in Exercise Physiology runs across trimesters 2 and 3; you enrol in it only once, in trimester 2, and exit it in trimester 3. EXS505 and EXS603 are corequisites; ordinarily, you must be enrolled in both simultaneously.

Please note: This course plan is a sample only and must be read in conjunction with the full course structure, unit prerequisites and enrolment options as outlined in the <u>Handbook</u>. Students should note that due to unit prerequisites, commencing study in Semester 2 may extend the duration of the course. This information is correct as at 18/10/23.
