

MEET YOUR PASS LEADERS

Hi! I'm

Sarah

BIO152

Bachelor of Veterinary
Medicine

About Me

Hi everyone! I'm Sarah & I'm a second year vet student! Having come straight from high school TRUST ME I know how daunting uni can feel, as well as how content-heavy this unit can be!! That's why I'm here, to help you. I have completed the unit and did well, so I want to share not just the content, but the study strategies and exam tips that actually helped me succeed.

Outside of uni I really enjoy acrobatics, arts, music, reading, the ocean and socialising. I'm definitely a social butterfly and always down for a chat, so feel free to say hi if you see me around campus!

I've got some really cool PASS sessions planned so come down, give it a go! PASS is actually where I met some of my closest friends, and it's the perfect opportunity to connect and collaborate with your cohort. I truly cannot wait to get to know each and every one of you. All the best!

Hi! I'm

Gordon

BMS107

Bachelor of Health Science/
Master of Clinical
Chiropractic

About Me

Hey everyone!

I'm Gordon, a 3rd-year chiropractic student (and international student) here at Murdoch. Outside of studying how human biomechanics work and keeping our bodies functioning at their best, you'll usually find me bouldering, hunting down good coffee, or working casually as a barista at Sushia in Building 360 (feel free to drop by and say hi). I might have a bit of an RBF at times, but I swear I'm super friendly!

I'm really passionate about helping you build confidence, figure out effective ways to tackle the unit, and grow in your university journey. PASS sessions are super chill, collaborative, and a judgment-free space where we figure things out together.

Whether you're stuck on a tough concept or just want to get ahead, I'm always happy to help. Looking forward to meeting you all in session this semester!

Hi! I'm

Derek

BSL165

Bachelor of Laws

About Me

Hi! I'm Derek. I entered BSL165 in my first semester with a feeling of apprehension, certain that a law unit would be a momentous challenge to overcome. A PASS Leader introduced themselves at the start of the first lecture, and I immediately signed up for PASS in the hopes of finding a way to tackle this unit successfully.

Funnily enough, BSL165 turned out to be the most enjoyable unit I've studied to date and my most successful. I found the methodical, thought-provoking nature of the content nurtured a more level-headed approach to studying, which I quickly adopted for my other units as well. In fact, I enjoyed it that much I used my result to transfer into a Bachelor of Laws!

Although this unit may seem daunting at first, I hope that together we can find the fun in tackling the content. It's with that goal in mind that I will endeavour to keep our PASS sessions engaging and entertaining. I look forward to meeting you all!

See you in PASS!

Hi! I'm

Rourke

CHE140

Bachelor of Science
(Environmental and
Conservation Sciences)

About Me

Hello! My name is Rourke, and I am a second-year student studying Environmental Sciences! I learned to love environmental sciences (especially marine biology) through watching Octonauts, Deadly 60 when I was growing up as well as every David Attenborough documentary in existence. Outside of studying, I love going to the beach, going on the bushwalks on campus and hanging out with my friends.

I found CHE140 to be quite a fun unit, but definitely a unit that had many difficult concepts to wrap my head around. As your PASS leader, my goal is to provide you all with an enjoyable and collaborative space to help with these difficult concepts and make this space beneficial for everyone at all levels of confidence with the content.

I'm excited to meet you all at PASS!

Hi! I'm

Claire

CHE144

Bachelor of Criminology &
Bachelor of Science

About Me

Hi, I'm Claire and I am currently in my 3rd year of study for my Bachelor of Criminology with a Bachelor of Science. I am here for anyone who wants help in getting the best mark possible in CHE144 as well as helping students foster strong study and time management skills.

University can be super tough, especially in your first year so other PASS leaders and I are here to help you through it and offer our advice on how to manage such a hectic workload. PASS is not just for those who are struggling so don't be afraid to come up to me if you are. We can work on ways to help improve both your scores and confidence.

I strive to help solidify your chemistry knowledge through games and a range of visual learning techniques. So if you're studying CHE144 this semester and think PASS could be of use to you, I hope you stop by and check it out. Plus, I offer some pretty sweet prizes to those who rock up! See you there :)

Hi! I'm

Sahara

CRM100

Bachelor of
Science/Bachelor of
Criminology

About Me

Hi, I'm Sahara, a second-year student studying Forensic Science and Criminology. After watching the Madeline McCann documentary at the age of 10, I developed an interest in forensics and all things science. Later I found a love for criminology, which led me to pursue a double degree.

Outside of Uni I enjoy swimming both in the pool and the ocean. Currently I am training for the Rottneest channel swim with a group of friends.

Having completed my first year in 2025, I understand how daunting Uni can be at first. PASS is a great opportunity to meet like-minded people and get a better understanding of the unit content. I aim to make criminology fun, accessible, and enjoyable for everyone. In PASS we will break down tricky concepts to make them more manageable, and I will share the best study tips and tricks.

Hope to see you all in PASS this year!

Hi! I'm

Bri

CRM120 & LEG100
Bachelor of Criminology

About Me

Hi! My name is Bri, and I'm in my third year of a Bachelor of Criminology. I'm really excited to be the PASS leader for CRM120 and LEG100 this year. I understand that both units can feel a little overwhelming when you first start. CRM120 introduces you to research methods, while LEG100 brings in a lot of new legal concepts. I remember feeling the same way when I began, but as I completed each unit, I ended up finding them both genuinely enjoyable and really rewarding.

As your PASS leader, I'm here to support you by creating fun, collaborative and effective study opportunities. Sessions will include games, group activities, discussions, and maybe even some prizes to help you build confidence in the content, whether that's understanding research methods or getting comfortable with foundational legal principles.

University can get busy and sometimes stressful, so if you're looking for extra guidance, a supportive study environment, or just a place to meet new people, I really encourage you to come along to PASS. I'm looking forward to hopefully seeing you in CRM120 or LEG100 PASS, and please feel free to say hi if you see me around

Hi! I'm

Lillie

EXS116

Bachelor of Sport and
Exercise Science

About Me

Hey! I'm Lillie, a second-year sport and exercise science student and your PASS leader for EXS116 this semester!

Outside of uni, I work part time as a pharmacy assistant, and in my free time I enjoy playing netball, travelling, and reading. I really enjoyed EXS116 and found it super interesting so I am sure you will too!

During our PASS sessions, I will help you break down the content for better understanding as well as provide study tips and tricks to excel in your assessments and exams!

I look forward to meeting you all in PASS!

Hi! I'm

Ream

ICT145

Bachelor of Data Analytics

About Me

Hi! I'm Ream, and I will be your PASS Leader for ICT145 this semester. I am a Bachelor of Data Analytics student with a double major in Business Intelligence and Data Science.

Before uni, I studied a Certificate IV and a Diploma in business, where I regained a love for learning and for technology (especially Excel; please don't judge). I realised how much I enjoyed analysing data to support decision-making, which led me to this degree.

Transitioning to IT was scary, especially as I had never programmed before uni. Although PASS was not offered when I studied ICT145, my experience with PASS for other units was invaluable. I made new friends, received advice on navigating university, and had overwhelming content simplified, so I knew exactly what to study.

I want to create that same space for you: a fun, judgement-free zone where we can ask questions, make mistakes, and figure things out together.

I look forward to meeting you all this semester!

Hi! I'm

Tilly

ICT159

Bachelor of Information
Technology

About Me

Hi! I'm Tilly. After working as an artist for many years, I decided to pursue a degree in art to formalise my skills. So in 2020, I joined Murdoch and started a degree in Games Art and Design. Through that degree, I had the opportunity to learn programming and fell in love, and so in 2023 I added my second degree in IT. I recently graduated from my first degree, and am now in my final year of IT.

As part of my 6 years at Murdoch I have been lucky to study abroad twice, in Seoul and Hong Kong through three different scholarships. I've also been actively involved in student leadership, serving as Vice President of the Women in STEM Society and currently as President of the Coding Club. Outside of uni, I've interned at CSIRO, been a technician at Apple and worked with multiple nonprofits.

Having come from an arts background, I know firsthand how daunting it can feel to transition into STEM. But I firmly believe that anyone can thrive in this field. I'm really looking forward to being your PASS Leader for ICT159 and helping you build the skills and confidence you need to thrive in this unit and throughout your time at Murdoch.

Hi! I'm
Rubin

ICT167

Bachelor of Information
Technology

About Me

Hi I'm Rubin! I am third-year IT student and the PASS leader for ICT167. I started at Murdoch in 2024 majoring in Games Technology with the goal of getting into game development, but by the end of my first semester I had become so interested in computer science that I changed to a double major in Computer Science and Games Technology.

ICT167 teaches some core concepts in computer programming, which can be quite difficult, so PASS is a great opportunity to break down those concepts with peers and really understand them.

This is the first time PASS has run for this unit, so I'm very excited to help the students succeed!

Hi! I'm

Alessandro

ICT169

Bachelor of Information
Technology

About Me

Hello, I'm Alessandro. I'm a second-year Bachelor of Information Technology student pursuing a double major in Internetworking and Network Security and Cyber Security and Forensics.

I enjoy messing around with technology, finding out how things work, and being hands-on. This is what led me to take various Computer Science classes in high school, which eventually led me to study IT here at Murdoch.

I wanted to be the PASS leader for ICT169 because I really enjoyed this unit, and I hope to help you enjoy it as much as I do by the end of the semester.

Hi! I'm
James

ICT285

Bachelor of Information
Technology

About Me

Hello! I'm James and I am in my third year of study here at Murdoch. I started at South Metro TAFE where I did my Cert IV in programming and enjoyed it so much to enrol into Murdoch University to get my Bachelor's degree. From there, I've been really enjoying the deeper learning I've gotten through my degree so far, and I look forward to supporting you guys to find that same enjoyment for learning as I have!

Outside of my studies and work, I really enjoy futsal (indoor soccer) and other social sports, light programming, board games, video games and adding to my keyboard collection. Don't ask me how much I've spent on that last one.

I love working through problems with people. If you have a tough problem, or trouble with what seems like a simple one, I want to hear about it! Databases can be very interesting and powerful, and I look forward to the opportunity to work with you and helping you learn all about it!

Hi! I'm

Zafeerah

LLB152

Bachelor of Law

About Me

I am Zafeerah, a third-year Bachelor of Laws student, and as your PASS leader, my goal is to create a supportive, interactive space where we can work through tricky concepts together and make learning enjoyable through games, discussions, and fun activities.

Alongside university, I work as a paralegal in a commercial law firm, where I see how the legal principles you learn in class apply in practice. I also volunteer with Women's Legal Service WA, designing educational resources that make the law easier to understand. Those experiences have strengthened my ability to break down complex legal concepts into clear, practical explanations, something I hope will help you feel more confident throughout LLB152.

Outside of law, you will usually find me reading fiction, listening to true crime podcasts on my commute, or searching for a great coffee. Whether you want to chat about torts, surviving your first year of law school, or where to find the best coffee on campus, I am always happy to chat.

I can't wait to meet you all and help make LLB152 a fun and rewarding experience!

Hi! I'm

Tali

MAS162

Bachelor of Laws/Bachelor
of Information Technology

About Me

Hi, my name is Tali, and I am currently in my penultimate year of studying Law and IT, majoring in Computer Science. I am excited to be your PASS Leader for MAS162.

When I first realised that MAS162 was part of my course plan, I felt apprehensive. It has been a while since I've done any maths and just the mere thought of studying maths on a university level seemed intimidating. Predictably, during the first few weeks of study, I struggled. I didn't know anyone in class, and I didn't feel comfortable enough to ask questions. It was only after I started attending PASS that things started to change. I made new friends, some of whom were from different disciplines than I, and formed study groups. It was this support system that truly helped me thrive.

I hope to foster a similar, safe learning environment where you have the chance to ask questions, work collaboratively, and bounce ideas off each other. Learning maths doesn't have to be a solo endeavor.

I am also working as a PAC this semester, so feel free to stop by the library and say hello. I look forward to meeting you all!

Hi! I'm

Luke

MAS164

Bachelor of Science
(Physics and Applied
Mathematics and Statistics)

About Me

Hi, I'm Luke, the MAS164 PASS leader. I am undertaking a Bachelor of Science with a double major in physics and applied mathematics and statistics. I originally began my degree in physics because I have a great interest in how everything works. Through this journey, I found a deep interest in mathematics accompanying my enjoyment of physics, leading me to pursue a double major. My love for these subjects led me to develop a great passion for my studies, which I hope to share with others.

I understand that maths can look intimidating at times, but I also know that through practice, it can become a beautiful language of logical communication. My goal as the MAS164 PASS leader is to get you to enjoy maths as much as I do and show that it doesn't have to just be a topic you study at university; maths can be a hobby. I also hope to push you to achieve grades above and beyond what you expected.

I hope to see you during the semester!

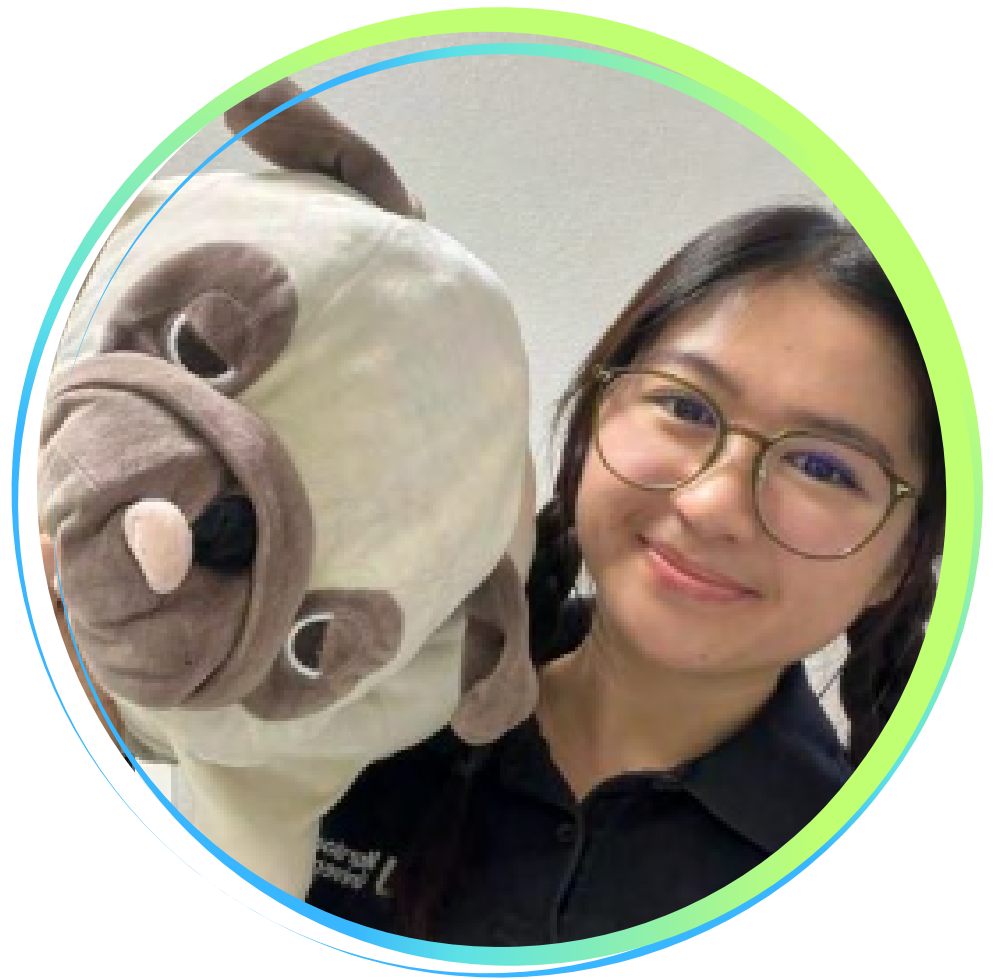

Hi! I'm

Yuki

MAS183

Bachelor of Veterinary
Medicine

About Me

Hi there! My name is Yuki and I'm a second year Doctor of Veterinary Medicine student. This is my second semester as a PASS Leader for MAS183 and I am beyond excited to be able to share my knowledge and perspective on statistics concepts that may be difficult to catch.

Come to PASS, where we break down complex ideas and absorb them in ways that can actually stick! Statistics is a challenging subject, but all you need is some background knowledge and PASS sessions (TRUST ME, IT'S NOT THAT SCARY). As cliché as it sounds, attending PASS helped me understand what was going on in the unit and ultimately achieve a good grade.

Don't be afraid to come say hi if you see me on campus or chat with me if you have any questions, I'm more than happy to help. Come learn with me and I can't wait to get to know each one of you there. SEE YOU!

Hi! I'm

Preet

NUR118 & NUR140

Bachelor of Nursing

About Me

Hey! I'm Preet. A second-year nursing student and your online PASS leader for NUR 118 and NUR140 for this semester. I find the human body really fascinating and I'm really excited to share my knowledge and learn lots from you all as well.

During my free time I love to bake, watch movies, going on walks with my dog, hangout with my friends and hiking. I have always wanted to be a nurse and love the variety of specializations available in the field.

I understand that the content of this unit can be really heavy and challenging as per my recent experience. Studying with friends, having loads of mnemonics, and asking a million questions helped me solidify my knowledge in this unit and helped me navigate through the challenges that one may face. I hope I am able to create a safe and fun environment where we can all work together to succeed and make new friends.

I'm looking forward to seeing you all in the PASS classes!

Hi! I'm

Monica

PSY173

Bachelor of Psychology

About Me

Hello! I'm Monica, a third-year Psychology student. I'm really looking forward to running PASS sessions that are engaging, helpful, and fun for everyone! I love being part of the Murdoch community, which is I try to get involved in a variety of activities including playing social netball and cheerleading with the Murdoch Vikings. In my downtime, I enjoy relaxing with my furbaby Harvey, rewatching my favourite TV shows, and treating myself to some sweet treats.

When I first enrolled in PSY173, I was terrified. I thought the unit was all about maths, one of my weakest points, but I quickly learned that wasn't the case. Thankfully, I attended PASS sessions for PSY173, and I'm so glad I did. They helped me consolidate what I'd learned, understand key concepts, pick up study tips and tricks, and prepare for assignments.

Overall, I highly enjoyed PSY173. It challenged me to step out of my comfort zone and try things I wouldn't normally do, like attending PASS and asking questions when I was unsure. I strongly encourage you to make the most of this opportunity. I hope you find PASS just as valuable and supportive as I did. See you at PASS!
