

MEET YOUR PASS LEADERS

Hi! I'm

Bri

CRM120

Bachelor of Criminology

About Me

I'm completing my 2nd year of a Bachelor of Criminology. I am very excited to be the PASS leader for CRM120 this year.

I understand that CRM120 can be quite daunting at first. When I first enrolled, I believed it was all math which terrified me as it is not exactly my strongest point. Thankfully this is not the case and as I completed the unit, I ended up loving it. As your PASS leader, I am here to support you by providing effective, fun and collaborative studying opportunities. The sessions will involve games, group collaboration, and maybe even some prizes to help develop your understanding of research methods.

I understand university can be busy and sometimes overwhelming. So, if you're looking for some extra support and guidance or just want a fun place to study while making some new friends, then I strongly encourage you to check out PASS.

Hi! I'm

Buket

MAS164

Bachelor of IT (Games
Tech/Internetworking &
Network Security)

About Me

I am a 3rd year IT student with an excellent academic record, and I hope that I can also allow you to achieve success in your studies.

I absolutely love maths and I am passionate about enabling anyone and everyone to understand and apply mathematics in their studies and everyday lives even if it is not their favourite subject. Especially so, if they struggle with it.

I am here to help you and show you that maths is not as scary as it might seem at first and we can help each other out through applying study skills, persevering and having fun while we tackle this unit.

I am also a gamer and I often think of mathematics as a puzzle game so let's switch our thinking from having to climb an impossible wall to having fun solving some puzzles.

Hi! I'm

Cameron

EXS116

Bachelor of Sport and
Exercise Science/Bachelor
in Science (Psychology)

About Me

Hi everyone! My names Cameron and I will be the EXS116 PASS leader for this semester. I work in both the PASS (peer-assisted study sessions) and PAC (Peer Academic Coach) teams whilst studying a combined bachelor's degree in Sport and Exercise Science, and Psychology.

My goal for this semester is to make learning fun by designing interesting activities, games, study skills and more. When I'm not on campus I might be seen playing Footy (Aussie rules football) or on the beach Fishing (and most likely catching nothing). When I am not outside, I might be in the kitchen pretending I'm a Master Chef but really, I'm just trying to not burn the house down.

I have been a student attending PASS session before and I found that they really helped me focus on what content was important and I also met friends in these sessions that I still study with today. PASS is for everyone, and my sessions will be student led with the goal on helping everyone revise the content and prepare for assessments. As I said before I would like to create fun activities to use in the PASS sessions, so come along and join in!

Hi! I'm
Chloe

CHE140

Bachelor of Laboratory
Medicine

About Me

Hi, I'm Chloe, a mature-age Lab Med student. After spending 8 years as a stay-at-home mum, I'm now studying part-time and loving the challenge of stimulating my brain again. I've worked as a camp leader, youth worker and swimming teacher, so I bring a passion for games and interactive activities to our PASS sessions.

Without any chemistry background and having struggled with maths, I understand how daunting CHE140 can seem in your first semester. But through hard work and dedication, I succeeded, and now I'm here to help you avoid struggling alone. I'll help you get the support and resources you need to excel in CHE140 and build a solid foundation for future units.

Each week, we'll review the previous week's content, so try to attend every PASS session to stay on top of things! 😊

Hi! I'm

Claire

CHE144

Bachelor of Criminology &
Bachelor of Science

About Me

Hi, I'm Claire and I am currently in my 3rd year of study for my Bachelor of Criminology with a Bachelor of Science.

University can be super tough, especially in your first year so me and the other PASS leaders are here to help you through it and offer our advice on how to manage such a hectic workload. PASS is not just for those who are struggling but don't be afraid to come up to me if you are and we can work on ways to help improve both your scores and your confidence.

I strive to help solidify your chemistry knowledge through games and visual learning techniques in groups! Plus, I offer some pretty sweet prizes to those who rock up so hopefully I see you there :)

Hi! I'm

Derrick

BMS107

Bachelor of Science &
Bachelor of Clinical
Chiropractic

About Me

I'm Derrick, a 3rd-year chiropractic student. Sports have always been a part of my life and I've always wanted to help people as a healthcare professional.

When I'm not buried in lecture slides, you can find me on the driving range or on a badminton court :)

I'm always excited to meet new people and learn about their experiences, so feel free to reach out if you share similar interests or just want to chat.

Looking forward to meeting you all in BMS107!

Hi! I'm

Eanna

MAS183

Doctor of Vet Medicine

About Me

My name is Eanna, and I am a second-year animal health/animal science student here at lovely Murdoch. I have a love for all things science-related and a particular love of medicine and quantitative STEM subjects, like mathematics, chemistry, and physics.

I'm here to help you navigate MAS183 this semester and hopefully show you a few tips and tricks that I used to get through the unit when I completed it. Maths and stats are some of my favourite subjects (don't judge me) and I am super passionate about helping others to see those subjects from a more approachable and non-intimidating perspective.

Hi! I'm

Gordon

CHI108

Bachelor of Science in
chiropractic / Clinical
Chiropractic

About Me

I am a 2nd year chiropractic student, so I'm also in the same boat as all of you!

I enjoy working out, running, and I've always had the greatest interest in human anatomy and its functions. Since I injure myself very often, it has always been my passion to be able to become a healthcare professional to help people with the same issues.

When I first enrolled in CHI108, I felt so overwhelmed with all the new, weird terminologies and complex systems that I just couldn't wrap my head around.

It was the PASS sessions that enabled me to meet a lot of my course mates and helped me gain so much more confidence with the discussions and detangling concepts together! I truly encourage everyone to join us and make the most of this opportunity.

Hi! I'm

Kohta

NUR134 South Street
Bachelor of Nursing

About Me

Hi I'm Kohta! I am currently in my second year in Bachelor of Nursing and your PASS leader for NUR134.

I have a Bachelor of Science (agriculture honours and marine science) and love biology related topics regardless of what creature... and video games, of course.

I have completed this unit last year and have a good understanding of this unit, and how nervous or overwhelmed you may be feeling. If you felt NUR131 was challenging, I highly encourage you to attend PASS sessions as it helps to develop study techniques through collaboration, activities and fun experiences. See you there!

Hi! I'm
Letitia

BSL165
Bachelor of Law

About Me

My journey at Murdoch started in criminology, where I majored in legal studies and took BSL165. I remember how daunting it felt to tackle a law-related unit for the first time. But as I discovered study strategies that worked for me, my confidence grew — so much so that I eventually transferred into a law degree!

Now, in my fourth year, I'm excited to share what I've learned and support you through PASS.

I know how overwhelming this unit can seem, especially if you're navigating it alone. That's why I want our PASS sessions to be more than just study groups — I hope they become a space where we can connect, build a support network, and help each other succeed. PASS not only strengthened my academic skills but also introduced me to friendships that have carried me through some of the toughest units. I can't wait to meet you all and start this journey together!

Hi! I'm

Luna she/her

ICT169

Bachelor of IT (Computer
Science and Games
Technology)

About Me

Hiya! I'm Luna, a second-year IT student and your PASS leader for ICT169. Before coming to Murdoch, I studied for 3 years at TAFE, 2 of which was in an animation and visual effects degree, and the last year was a Cert IV in Programming where I found my passion for coding and computer science. I have a fascination with retro software, specifically game engines. I love diving into the nitty-gritty of programs, learning how my lines code translates into the bits and bytes that tell my computer what to do. As you can probably tell, I love games, but I am also a movie lover too, with The Matrix being my favourite movie of all time.

As a mature-age student going to university for the first time in my life, I was terrified. I knew nobody here, and I was making a massive leap outside of my comfort zone. So, when I heard about PASS at my orientation, I jumped at the chance to join. I'm glad I did. I learnt a lot, I did well in my units, I made lots of friends, and I didn't feel so alone. I want to help give you that this year. I can't wait to see you all there!

Hi! I'm

Michelle

NUR134 Mandurah

Bachelor of Nursing

About Me

Hi, I am Michelle, a second-year nursing student at the Mandurah campus. I am enthusiastic about this degree, and love sharing the learning journey with my peers.

I am a mature aged student who had not studied in a long time before commencing in 2023. Bioscience content can be challenging, in my experience reinforcing my learning and sharing understanding together is what solidified some tricky concepts for me as a first-year student. I firmly believe there is NEVER a silly question, ask away, I am here to help.

I hope my recent experience in your shoes and my contagious attitude to group learning will see us facing and succeeding in the challenges we face as students; the rewards are immense.

I look forward to meeting you at PASS classes and getting to know you this semester.

Hi! I'm

Mimansha

ICT582

Master of IT

About Me

Hello everyone! My name is Mimansha and I will be your Pass Leader for ICT582 this semester.

As a master's student in IT, I have had my fair share of programming challenges, and I understand that Python might be a new language for some. Navigating through new concepts can seem overwhelming at first, but for me attending PASS classes helped everything fall into place. Whether you have never written a line of code before or have dabbled in programming, you will find a welcoming environment to grow your skills. I have found that working together helps you understand Python's logic and syntax faster, and you will start seeing how programming can solve real-world problems.

So, let's make learning Python fun and approachable! I am looking forward to meeting you all and helping you thrive in your programming journey!

Hi! I'm

Monica

PSY173

Bachelor of Science
(Psychology)

About Me

Hello! I'm Monica, and I am studying a Bachelor of Science, majoring in Psychology. I am the PSY173 PASS leader and look forward to providing engaging, helpful and fun PASS sessions for anyone and everyone!

I live a very colourful and busy life! I work part-time as a medical receptionist and volunteer with several youth organisations. In my downtime, I chill with my furbaby Harvey, rewatch my favourite TV shows, and eat and eat! (Yes, all I do is eat!).

I had attended the PASS sessions for PSY173 previously, and I was so grateful that I did. It helped me consolidate what I learnt and understand confusing concepts. I also managed to meet some incredible people!

Overall, I really enjoyed PSY173, and I hope you get as much out of PASS as I did. I am excited to meet and know every one of you and walk with you in the journey of PSY173.

Hi! I'm
Nasla

ICT519
Master of IT

About Me

Hi! I'm Nasla Joshi, a second-year Master of Information Technology student majoring in Networking and Cyber Security and your PASS leader for ICT519 this semester.

I am an international student from Nepal. Moving to a new country and adjusting to university life was challenging—being away from home, adapting to a different education system, and finding a support network.

PASS helped me in my first semester by showing me that everyone is on the same journey, learning at their own pace.

I'm excited to create that same welcoming space for you. I believe learning is more effective when we collaborate and support each other. Looking forward to meeting you all and making this journey easier and more enjoyable together!

Hi! I'm

Ren Yi

BIO152

Bachelor of Science/Doctor
of Veterinary Medicine

About Me

Hello everyone! My name is Ren Yi, I am currently in my second year of Veterinary Medicine at Murdoch University. I have a huge passion for helping others—animals included—which inspired me to become a PASS leader!

In my free time, I enjoy spending time with my dog back in Singapore, jamming out to music with friends, and playing sports.

I thoroughly enjoyed taking BIO152 last year, especially the PASS sessions. I wish for everyone to experience the same joy I did while learning, discovering that the subject is not as daunting as it might seem!

I'm here to support you, help you understand challenging concepts, and make your studies more manageable.

I look forward to meeting you all, see you at PASS 😊

Hi! I'm

Shaun

ICT285

Bachelor of IT (Computer
Science & Games
Technology)

About Me

ICT285 is a fascinating unit that covers the core principles of databases, an essential part of the IT industry. While some technical aspects can be a bit challenging, the skills you gain are incredibly practical and widely used in real-world applications.

One of the best ways to study for ICT285 is by discussing concepts and problem-solving strategies with fellow students. Sharing ideas not only helps reinforce your own understanding, but it also exposes you to different perspectives and can clarify areas where you might be off track.

I believe in making the most of university life which includes making as many friends as possible and experiencing uni culture during your time here. Outside of PASS, I'm also a PAC, student ambassador and active in the university community space as I am the current president of the Murdoch Coding Club.

Hi! I'm

Suliana

CRM100

Bachelor of Criminology &
Psychology

About Me

Hi everyone! I'm Suliana, and this will be my third semester as your PASS leader for CRM100 (Introduction to Criminology). Teaching PASS for this unit is something I truly enjoy because in our sessions, we get the chance to explore and interpret theoretical aspects of criminology in a no-pressure, fun environment. I believe in the power of contextualising your learning, and we often work on linking what we study in CRM100 to real-world situations, making the sessions both engaging and relevant 😊.

PASS won't just be about learning the content; it's also about working together to improve your critical thinking, research abilities, and active recall skills (especially important for the exam). I look forward to meeting you all in the PASS sessions for CRM100 this semester!

Hi! I'm

Tali

MAS162

Bachelor of Law/Bachelor of
IT

About Me

Hello, my name is Tali, and I am currently in my third year of studying Law and IT and I'm excited to be your Pass Leader for MAS162 this year.

I know how daunting taking a maths unit can be, especially when you don't come from a STEM background. It was only after I started attending PASS classes that things started to change for me. PASS gave me a safe environment to connect with my peers. I made friends, and it was this support system that truly helped me thrive.

Learning maths doesn't have to be an isolating and scary experience and working through questions together helps grasp the content faster as you can learn from each other.

This will also come in handy when it's time to work on your assignments – as MAS162 encourages you to work in groups.

So, if you feel unsure or overwhelmed, come to PASS – I look forward to meeting you all!

Hi! I'm

Tara

LLB152

Bachelor of
Laws/Communications
(Journalism)

About Me

Hi, I'm Tara, and I'm in my final year of Law and Journalism.

When I first took Torts, I wasn't sure how to approach studying substantive law units. That's why, in our PASS sessions, I'll focus not only on helping you understand Torts but also on building the study techniques and skills that will set you up for success across all your law units.

I've gained experience working in several commercial law firms, and I'm always happy to share insights and tips to help you prepare for your own legal career.

During my time at Murdoch, I've been involved in student organisations like the Murdoch Student Law Society (MSLS). If you haven't joined MSLS yet, I highly recommend it! It's a great way to meet other law students, access resources, and build your career network.
